An evolution in window engineering

Inspired by Westcoast Contemporary design, and influenced by building science, Westeck's newest line of windows provides an innovative solution for today's energy-efficient home.

The Westeck Westcoast Contemporary line of windows includes the Slider, Casement and Casement-Combo product series. With thoughtful design, focusing on what matters most, each series redefines our expectations for windows.

The Westeck Westcoast Contemporary line of windows allow for bigger and better views, cleaner lines, cleaner glass, easier operation and industry-leading safety.

The 2300 series window is a high-performance PVC framed slider and fixed window system. This innovative window is designed for color, ease of operation and impressive thermal performance. Thermal values outperform many PVC casement and tilt turn window systems.

The 4300 Combo series window combines the advanced stainable simulated Douglas-Fir interior laminate with the 4300 Casement. The warm and authentic interior wood look combined with PVC creates a beautiful and low maintenance window. This innovative window is designed for maximizing the view, ease of operation and impressive thermal performance. Thermal values reach Passive House and Net Zero targets.

Customer Spec Custom

Stain color will be affected by the color and type of material or wood substrate to which it is applied.

The World's First Flexible Window Screen

Simple Design

Our revolutionary design utilizes a PVC coated, high-performance spring steel frame. However, innovation does not need to be complex, so you will not find unnecessary attachment hardware on FlexScreen.

Damage Resistant

We were tired of bent aluminum frames, scratched paint and broken hardware. So we built a window screen that can be thrown from the top of a five-storey building without being damaged.

Beautifully Invisible

FlexScreen hides in the window screen pocket, drastically improving sight lines and eliminating the need for color matching.
